SQL

Insert Command

INSERT COMMAND

This command is used to insert a new record into the specified table

```
INSERT INTO table_name (col1, col2, col3, ...)
    VALUES (value1, value2, value3, ...);
```

- It is not neccessary to insert data for all the columns. when lesser columns are specified, remaining columns will have either default value or NULL.

INSERT in ALL columns

```
INSERT INTO tablename
VALUES
(val1, val2, val3, ....);
```

Values must be in the same order as the columns in the table

Insert Multiple Values

```
INSERT INTO table_name (col1, col2, col3, ...)
  VALUES (value1, value2, value3, ...),
         (value1, value2, value3, ...),
         (value1, value2, value3, ...);
```
